Hi, thank you for your consideration in working together. Below is a pricing table of web development services we currently offer.

Please note: the price estimates as described in this document are accounted for in US dollars. Estimates are subject to change based on project needs and expectations.

Our work is always built from scratch and with love.

	Notes	Pricing
Landing Page	A one page website to showcase your work/brand/company	$400
Blog	A personal/company blog	$1000
Static Website(5 pages)	Your everyday website ex. About Us, Contact, Product information, etc.	$2000
Dynamic Website with CMS	5 page website with backend and built from scratch CMS	$6000
E-commerce	Static product pages, payment, CMS	$20,000
Web App	Do you have an idea for a web application? Can we build it for you? Fully-functional web application with features such as user database, growth tracking, analytics, etc.	Varies on size of project
WeChat Mini-Program	Interested in expanding your brand on WeChat? We'd love to share more information with you on WeChat Mini-Programs	Varies on size of project

Below is an outline of some of the services we provide when it comes to building a 'dynamic website with CMS'.

Custom Dynamic Website with CMS - $8,000

		Notes
Planning Stage		
Client Discovery	Time to understand your brand/company	We will need time to feel out your brand and understand your mission.
Site mapping	Planning what is required on the website and where they will live	
User journey and User cases	Understand how visitors or users will interact with your website	
Prototyping development	Wire framing, blueprint, and layout of the webpage	
Designing Stage		
Initial Design	Create design mockup	
Styling	Font selection, color scheme, style guide	Style guide will reference text options
Components	Designing of cards, icons, buttons.	Components will be styled accordingly to brand design and identity.
Brand refinement	Implement a new or existing brand design into website	
Final Design	Finalize design mockup	Based on feedback, refine for final design
Development Stage		
Build custom backend	CMS we will build from scratch	This is the back-end dashboard for your website manager. You will be able to edit/update pages and blog posts.
HTML & CSS styling		
Front end JS implementation		The sexy bits of your website
Website deployment Stage		
Storing web project	Create git hub repository	Share github repo your company. So you have access to the code
Web Hosting	We will find you a webhosting server for you to host your website and help with registration	
Domain Configuration	We will direct your website to your domain	If you have a domain, we just need the log-in credentials.
Populate content		Any copywriting, images, video must be provided by the company.
Performance Refinement		This is the phase where we will make sure your website runs as fast as possible
Review and refine		Last clean up bits
Launch	Push to production
